

HYPO-CHLORINATION UNIT, PURIFICATION, 2-350																													
	TAMCN: B1140																												
	ID: 09476B																												
	NSN: 4610-01-364-4485																												
Functional Description																													
<p>The Hypo-Chlorination Unit, Purification 2-350 GPM is designed to mix a proportional amount of hypochlorite solution (Sanitizing agent) with water in the Tactical Water Distribution System (TWDS). The unit may be positioned in line so that water is chlorinated prior to entering the storage tank or before delivery to the user. Man portable.</p>
